According to Entrepreneur, in 2004 the total number of small businesses in the USA was 24.7 million. This of course does not take into account any of the medium and large-sized companies or corporations. Additionally, statistics show that each year more than 600,000 new businesses are formed and prosper. Clearly the entrepreneurial spirit is thriving in America, regardless of economic cycles and world events. Most companies realize that in the modern world the necessity to accept payment in the form of credit or debit cards is essential to business viability. The convenience of credit card usage is paramount to most consumers, and has become the most common form of business-to-consumer payment choice in today's financial marketplace. Every day hundreds of millions of merchant transactions occur worldwide.

If you were to offer these businesses the option to not only receive a potential significant discount from their current merchant fees and costs (that they are already paying); but also the ability to give a portion of their merchant fees to the non-profit cause of their choice, why would any business say no? Not only will the program be saving money on each and every transaction charge, but they will also in be giving to the charity, church, school, foundation, faith-based organization or other non-profit group of their choice. Then add to these benefits the fact that there is absolutely no switch-over costs or fees for the company to join the program. Changing-over is also a seamless, easy process. All they have to do is plug-in their new free terminal, and their processing will then be setup & activated; benefitting the cause of their choice. TFH also provides internet gateway processing, Point-Of-Sale (POS) systems, and cutting-edge marketing tools - so virtually every company should want to switch over.

In summary, you will be representing an essential product to businesses that may save them significant money, allows them to freely give extra to the special non-profit cause of their own choice at no extra expense to them, free state-of-the-art terminals and terminal upgrades, POS systems, free interactive customer relationship marketing tools, and also costs them absolutely nothing to join and switch-over to.

**As an independent sales agent, can you think of any easier product to represent?**
